Welcome November...

Welcome Fall! The month of October marked a milestone for Parent to Parent! During the 2016 regular session of the Washington State Legislature, HB 2394 was passed. This bill included the following:
It is the legislature's goal to continue, support, and enhance the (Parent to Parent) programs in these (existing) counties and expand these programs statewide by 2021.

The Legislature also followed with funding for these 5 remaining counties (San Juan, Wahkiakum, Ferry, Stevens, Pend Oreille). In October, we established our last program in Stevens/Pend Oreille Counties at the northeast corner of the state. We have a new coordinator, Kristin Smith, who was hired and is currently participating in on-boarding. And... we met the goal of establishing these programs before 2021!!!

Parent to Parent now stretches from corner to corner or our great state, supporting families raising children with special needs- in the big cities and small communities- WE’RE THERE!

Welcome, Kristin Smith, New Coordinator for Pend Oreille and Stevens Counties.
---Tracie, Theresa, Patricia and Jackie

**Family Focus**

The Power of a Parent Match

When you get a new diagnosis for your child that you never expected, it is life changing. Isolation and grief come flooding in along with the questions of why me? Why us? It can feel like no one else knows what is going on and that is where a parent match comes in and saves the day. Finding another parent that knows those feelings and has had similar experiences can mean so much. I didn’t get individually matched when we got our diagnosis for my daughter but I found the support through groups such as Holland, or the Autism support group helped so much. I have made friends that I never would have met otherwise and they are some of my best friends. After having received this support I wanted to share with other parents that might be getting a new diagnosis- to help them through those questions and feelings I had when we were new on this journey. I attended Parent to Parent’s Helping Parent Training, and then about a year ago. I was matched with a parent that had received a new diagnosis for her child that was the same as my child’s. Even though this mom lived hours away, we were able to connect via text. Over the last year we have kept up texting when something was going on or that mom had a question. Being able to share my experience or give validation to how she is feeling really makes me feel great as well, and it also reminds me that there are more people out there that are going through the same thing. Awhile back I got the privilege of meeting her as they were in town for an appointment. When I walked in she gave me a hug and it was like seeing a long lost friend that I haven’t seen in years. We sat there and talked for almost 2 hours about different things with our children and what was new or going on. Meeting her just brought joy to my life and I could see the joy in her face of being able to talk to someone that understands. The next morning I got a sweet text from the mom thanking me for meeting her and talking with her. She thanked me for my kindness and friendship. This connection and match has meant just as much to me as it does to her. I have made a new friend for life.

~~By Danielle W.

**CONFERENCES**

10th Annual Southwest Washington Autism Conference (held online) *informational flyer*

- Friday, November 13, 2020
1.) My name is Sarah Greene. I am a Skidmore College graduate with a Bachelor of Arts degree in psychology and honors in dance. Shannon Jacovino, Director of Advocacy & Public Policy at the Arc of Connecticut, suggested I reach out to you directly.

I taught and developed my own curriculum for a dance class at Saratoga Bridges, which is a non-profit organization, located in Saratoga Springs, New York. Teaching at Bridges was an incredibly uplifting experience for myself and my students. This led me to create Human Illustration! Human Illustration is an online dance platform for individuals with special needs. Saratoga Bridges is the first to collaborate with Human Illustration through a grant.

Our mission is to give our students a high caliber experience that will allow them to reach their fullest potential and be proud of who they are.

We offer 4, 8 and 12 week classes. These classes include basic ballet fundamentals, choreography and various ways to develop your artistry. I am confident your students will be empowered and inspired through class, however if not satisfied after your first class, a full refund is available.

If you have any questions at all, please do not hesitate to contact me at (914) 806-2595 or by email: sdgreene16@gmail.com. You can also book a Zoom meeting you prefer. I look forward to collaborating with you!

Our website is easy and accessible to use! Please visit us at: https://humanillustration.com/

Best, 
Sarah Greene
Founder of Human Illustration
https://humanillustration.com/

2.) Virtual Workshop - Telling Your Story with a Purpose
We teach a process for someone to incorporate their personal story into an ask for a policy or systems change to a decision maker (e.g., legislator, school board, city council, etc.). And, how to do that in 2-3 minutes.

Registration: https://fathersnetwork.org/telling-your-story-with-a-purpose-workshop/

3.) Cultivating Resilience in Children With Special Needs
Resources to support families during ‘the most complicated school year in American history

4.) We are seeking your support and collaboration in our efforts to hear the voices of youth and young adults with disabilities and their allies. The WASILC Youth & Young Adult Committee is committed to the independent living philosophy “Nothing about us Without us.” At the close of this survey, we intend to provide feedback and guidance to individual counties and the state as a whole, but we recognize that Washington is a large and diverse state and we need to hear from every corner. Please take this opportunity to have your voice heard.

You can find the WASILC Youth Transition Survey at our website, available in English and in Spanish. There are separate links for Youth/Young Adults and for their allies.

Please share this survey with your networks. We hope that this survey reaches as many youth and young adults with disabilities and their allies as possible.

Link for Survey in English and Spanish
5.) Pathways to Respite - Our new respite toolkit, Pathways to Respite, offers information and resources for those who support:
   · an older adult
   · child or adult with a developmental disability or other disability
   · adult with traumatic brain injury

Developed by Informing Families, a resource of the Washington State Developmental Disabilities Council, in partnership with the Washington State Developmental Disabilities Administration, Aging & Long-Term Support Administration, and PAVE, which administers Lifespan Respite WA.

6.) When children with sensory processing disorders encounter their triggers, they may experience sensory overload, which can cause them to lash out physically or verbally, shut down, or exhibit other signs of distress. Learning how to manage a sensory processing disorder effectively must start with understanding the biology of sensory processing disorders as well as the signs of sensory processing disorder and their comorbidities, which we hope this guide will help many people accomplish.

7.) The Washington COVID-19 Immigrant Relief Fund opened for applications on Wednesday. The fund will distribute $1,000 per person, and up to $3,000 per household, to Washington residents ineligible for federal stimulus funds and unemployment benefits due to their immigration status. More information can be found at: https://immigrantreliefwa.org/

8.) Wednesday 11/04 1:00 - 3:00 pm PST - Discovery Essentials with Jenny Crook

These courses are free for Washington State residents ONLY.

For WA residents only: use the promo code WASTATE and click 'apply'. If you live and/or work outside of Washington State, the $25 fee applies.

Registration

9.) Wise Online Academy 100 Series: Job Development & Marketing

The next Wise Online Academy 100 course starts November 3rd. Join instructors Charly Walters and Emily Harris for this five-part online course that will offer a thorough overview of the essential functions of marketing and customized job development.

Course dates are November 3rd, 5th, 10th, 12th, and 16th Register

Cost is reimbursable for WA residents, and the WOA 100 Series is now ACRE approved! Upon successful completion of the WOA 100 Series, attendees earn an ACRE certificates of achievement in Basic Employment Services and their names are added to the national registry.

10.) Coffee & Conversations - Our new 6-week Coffee & Conversation series will be a virtual technical assistance forum for professionals who are providing Community Inclusion services. Every other week, join Josie Sparks for a 1.5-hour session to connect and learn together. Conversations will feature experts on various topics using tools, problem solving, finding and developing new resources and opportunities in a remote and virtual setting.

   Week 1: November 2, 2020 --- Register for Nov 2nd.
   Community Reentry with Debbie Moore

   And Save the Date for more upcoming Coffee & Conversations:
   Week 2: November 16, 2020
   Week 3: November 30, 2020
   Week 4: December 14, 2020

11.) When kids struggle socially, it can be difficult to know how to respond as a parent. Do we correct them? What do we do with our own internal reactions? Also, do we sometimes expect more of kids struggling in this area than their neurotypical peers? Barry Prizant, PhD, author of Uniquely Human, recently named the #1 book on autism of all time (!), has some great ideas.

Click here to take a listen.

12.) Special Education is a Service, Not a Place

An ill-informed conversation about special education might go something like this:

   · Is your child in special education?
   · Yes.
   · Oh, so your student goes to school in that special classroom, by the office...in the portable...at the end of the hall...in a segregated Zoom room?
Regardless of whether education is happening in a school building or virtually, this conversation includes errors in understanding about what special education is, how it is delivered, and a student’s right to be included with general education peers whenever and wherever possible.

How Parents Can Support Children With Special Needs During Distance Learning.

How Teachers Can Help Students With Special Needs Navigate Distance Learning.

Engaging Families in Affirming Trauma-Informed Care for LGBTQ Children and Youth. Outlines techniques for engaging families in affirming treatment and care of their LGBTQ youth, including a review of techniques used within the Family Acceptance Project (FAP) with founder Caitlin Ryan. FAP is an initiative that works to prevent health and mental health risks for LGBTQ children and youth while using a research-based, culturally grounded approach to help diverse families support their LGBTQ children. Practitioners will examine ways to engage in cultural humility and understanding when engaging families and youth in trauma treatment.

The Great READ: Reading, Exchange and Dialogue. Thought-provoking books, podcasts, and films can pave the way for change by inspiring understanding, compassion, inquiry, and conversation. That’s why earlier this year, NICHQ staff came together to share the books that have most affected their understanding of equity and what’s needed to achieve it. Since then, we’ve added more books, podcasts, and films to the list! This article shares our top picks with the hope these resources will support our readers on their equity journeys.

WIC helps families in many ways. DOH is trying to outreach pregnant women, new moms, and families with young children eligible for the WIC Program, which DOH administers in Washington State. This message is suitable for mothers, primary care providers, doulas, community health workers, child care providers, and community organizations that serve them. By sharing the message below, you are helping people gain access to an essential public health service that meets critical nutrition and health needs for families:

Washington WIC gives families access to nutritious food and provides health screening, risk assessment, nutrition education, breastfeeding support, and referrals to health and social services. The program provides essential services for pregnant people, new and breastfeeding moms, infants, and children under five. Most pregnant people and young children on Medicaid or Basic Food (SNAP) qualify for WIC services.

To meet the needs of families during the pandemic there have been important changes to the program:

- WIC enrolls new applicants, provides nutrition education and breastfeeding support, and issues food benefits by phone or video chat.
- WIC expanded the choice of foods allowed for purchase using WIC benefits.
- Participants now shop for WIC foods using a WIC card, which makes shopping easier.
- The WICShopper app is also making shopping easier, as well as providing recipes and parenting tips. More than 90 percent of the families on Washington WIC use the WICShopper app.

https://www.doh.wa.gov/YouandYourFamily/WIC/ShoppingwithWIC/WICShopperApp

Given layoffs and other economic consequences related to COVID-19, people may be seeking WIC services for the first time. WIC has capacity and welcomes new families. To find WIC services in your area:

- Text “WIC” to 96859
- Visit ParentHelp123’s Resource Finder:
  https://resources.parenthelp123.org/services/wic-nutrition-program-for-women-infants-children
- Call the Help Me Grow WA Hotline at 1-800-322-2588

2019 National Survey of Children’s Health Data. The Health Resources and Services Administration’s Maternal and Child Health Bureau released the latest data from the 2019 National Survey of Children’s Health (NSCH) on October 5. The NSCH provides annual, national and state-level data on the health and health care needs of children, as well as information about their families and communities. The NSCH covers a broad array of health-related topics impacting children and families such as mental and behavioral health. The survey data reveals that 13.2 percent of children aged 3-17 years in the U.S. (about 8 million children) had a current diagnosed mental or behavioral health condition as of 2019.
mental or behavioral health condition. The most common condition was anxiety, which affected 8.5 percent of children, followed by behavior disorder at 6.8 percent and depression at 3.8 percent.

The Public Charge has been vacated and should not be applied at this time. Here is the update in full.

COVID - 19 RESOURCES

NEW! Leading through Crisis-The Importance of Mindset, Self-Care, and Leader Resilience, Nov. 18, 1-1:45 p.m. During this uplifting session, Marissa Levine (alumni-VA) will draw on her 16 years of state government service and expertise in leadership to share the important role of mindset, self-care, and resilience with public health professionals leading during the COVID-19 pandemic.

Breastfeeding & COVID-19: FAQs
Yes, breastfeeding is still considered safe during the pandemic. In fact, it continues to be encouraged by medical organizations, including the Centers for Disease Control (CDC), the World Health Organization (WHO), and the American Academy of Pediatrics (AAP). Most nutritional experts believe that breastfeeding protects infants from infection in general, and COVID-19 is no exception.

News release - WA State Healthcare Authority - For immediate release - July 6, 2020
State launches Washington Listens program to support people affected by the stress of COVID-19. The program includes a phone line to speak with support specialists and connect to community resources.

OLYMPIA - In response to COVID-19, Washington has launched Washington Listens, a support program and phone line to help people manage elevated levels of stress due to the pandemic.

People who call the Washington Listens support line will speak with a support specialist and get connected to community resources in their area. The program is anonymous.

"Washington Listens helps people cope and strengthen their resiliency in these uncertain times," said Sue Birch, director of the Washington State Health Care Authority, the agency managing the program. "It complements the state's behavioral health response services by providing an outlet for people who are not in crisis but need an outlet to manage stress."

"This pandemic has had far-reaching effects that extend beyond our physical health. It's important for people to have access to support as we all work through the stress and trauma of the past few months."
We are still in this fight against this virus, and this assistance will help Washingtonians recover during this uniquely stressful time,” said Mike O’Hare, FEMA Region 10 administrator.

The Washington Listens support line is 1-833-681-0211. It is available from 9 a.m. to 9 p.m. Monday through Friday, and 9 a.m. to 6 p.m. Saturdays and Sundays. TTY and language access services are available by using 7-1-1 or their preferred method.

Providers and tribes that have partnered with Washington Listens include American Indian Community Center, Colville Tribe, Community Integrated Health Services, Crisis Connections, Frontier Behavioral Health, Okanogan Behavioral Healthcare, and Swinomish Tribe.

The Washington Listens support line is made available by a $2.2 million Crisis Counseling Assistance and Training Program (CCP) grant funded by Federal Emergency Management Agency (FEMA) and supported by the Substance Abuse and Mental Health Services Administration (SAMHSA). This program supports short-term interventions to mitigate stress, promote the use or development of coping strategies, and provide emotional support to help Washingtonians understand and process their stress.

Resources and self-help tips are available on walistens.org.

Seven Strategies for Conducting Services Virtually.
Across the country, health and social service providers have had to find new ways to support children and families in the face of COVID-19. Home visiting services, pediatric well-child visits, prenatal care and mental health appointments have largely had to transition from in-person appointments to visits virtually—either via phone or video. By learning how to conduct a successful virtual visit, health and social service providers can help ensure children and families receive the support they need during and after this pandemic. Use our new infographic to share strategies on conducting successful virtual visits. https://www.nichq.org/insight/seven-strategies-conducting-services-virtually?utm_campaign=Newsletters&utm_medium=email&_hsmi=90054865&_hsenc=p2ANqtz91bEvHqSC2UdEdt15U9WTSmoHSORRx4V8E1bHXw3DsbYG9HHJpIQ42DPlt0MrptBueXoSV4TjyNYwy1rihNp8Q7R6SA&utm_content=90054865&utm_source=hs_email#infographic

2. Washington State Leadership Board's Boundless Washington Overview
Boundless Washington is an equity focused program that integrates fun, challenging outdoor activities with leadership training for young people with disabilities in Washington state. At capacity, the program will sponsor 20 middle and high school students to participate in the program. Launched in 2020, the program currently serves 9 students all over the state. (see more click on flyer with information)

3. Save the Date! You are invited to attend a free virtual conference
Planning Today for a Safer Tomorrow - Disabilities in Emergency Preparedness Conference
November 17-18, 2020
Tuesday: 8:30am-4:30pm | Wednesday: 8:30am-12:00pm
Supported By: WA Emergency Management Division (EMD) | WA State Department of Health (DOH)

4. September is Childhood Obesity Awareness Month.
Children with obesity are at higher risk for other chronic health conditions, such as asthma, sleep apnea, bone and joint problems, and type 2 diabetes. They also have higher risk factors for heart disease like hypertension and high cholesterol. The Centers for Disease Control and Prevention's website features information to support healthy growth in children.

STUDY: Breastfeed Infants Less Likely to Have Overweight.
Breastfeeding, as the normative standard for infant feeding, promotes optimal growth and development and can prevent childhood obesity. To learn more about the differences in growth patterns of breastfed and formula-fed infants, read this AAP publication.

5. Tips for Healthcare Professionals: Coping With Stress and Compassion Fatigue.
This tip sheet explores stress and compassion fatigue, as well as signs of distress after a disaster. It covers strategies healthcare providers can use to reduce their stress during this time and information about coping with compassion fatigue.

6. Transitioning to Virtual Services and Support for Children and Youth with Special Health Care Needs and Their Families
Clinicians, early intervention providers and other community service services providers and educators are having to quickly ramp up telehealth and online learning capacity during COVID-19. (For the rest of the article)
7. Finding Your Way in Community: Free Online Mindfulness Groups for Parents and Caregivers (Supporting each other through meditation and communication.)

8. Mental health symptoms in school-aged children in four communities.

9. Helping Children Thrive: Early Childhood Development & ACEs.

10. Youth Mental Health: Trends and Outlook.

12. Educating youth (ages 14-24) on current, in-demand, employment opportunities; navigating accommodations through interactive online activities; and real-world business opportunities shared by business professionals, providing insights on advocacy and employment. Please read attached flyer for presentation dates/times/presenters that will take place throughout the month of October. All presentations are done with Zoom.
